Note: In clause 23 the ADSp 2017 deviates from the statutory liability limitation in section 431 German Commercial Code (HGB) by limiting the liability for multimodal transportation with the involvement of sea carriage and an unknown damage location to 2 SDR/kg and, for the rest, the customary liability limitation of 8,33 SDR/kg additionally to Euro 1,25 million per damage claim and EUR 2,5 million per damage event, but not less than 2 SDR/kg.

In addition the Fair and Exhibition Conditions are applicable. The "Bundesfachgruppe Schwertransporte und Kranarbeiten (BSK)" terms and conditions are the basis for heavyload orders.

For goods which are under temporary importation and the charges have to be paid by the company which is located outside the European Economic market's territory (EEC), no German turnover tax has to be debited on our charges. But all our charges are taxable if the shipment for which they do occur has to be finally imported into Germany/EEC. That can be eg. catalogues, which have been given free by customs, as well as products who have already been sold within Germany or the EEC market.
